

**polisile**

## Tough Co-Extruded Silage Sheet

- High impact and tear resistance
- High resilience to weathering
- Excellent opacity
- Unique polymer formulation
- Co-extruded
- British made

# Tough Co-Extruded Silage Sheet

## About bpi.agri

bpi.agri is one of the foremost suppliers of balewrap and silage sheeting in the U.K.

It is a division of British Polythene Industries, itself the largest manufacturer of polythene film, bags and sacks in Europe.

The company has been producing high quality bale and silage products in the agricultural market for over two decades and now sells products in over 50 countries across the globe.

As well as developing respected brands such as Silotite, Visqueen Poliwrap and Visqueen Agri-S, bpi.agri also brings to the market a wealth of experience, expertise and technical knowledge, helping Farmers and Contractors alike to consistently produce high quality and nutritious fodder.

## Polisile

Polisile is a particularly strong, three-layer sheet, developed to meet the demands of maize silage.

The individual layers are bonded together during the extrusion process, providing exceptional strength and also added resistance to puncturing.

The avoidance of high temperatures and

consequent spoilage is particularly important within the maize clamp, which is why one side of each Polisile sheet is a pale colour. This, applied uppermost, reduces heat absorption.

The standard colour of Polisile is black/white. Other colour options available are green/white, black/green and white/white.

Polisile customers not only benefit from the latest technology, but also from the expert advice and after-sales service provided by our team of silage sheeting specialists.

Polisile is available in widths up to 18.3 metres. Details of all sizes are available via your supplier.
